

November 10, 2025: Report to the FBI

I am being held inside of a spying bubble of oppression by the President of the United States of America.

I am an attorney at law that filed lawsuits after the 2020 election to investigate the underlying data that supported the results that were reported by the eight largest counties in the State of Texas.

Since then, my home has become the subject of an overbearing spying campaign that attempts to synchronize vehicles to my movements and work habits.

The general daily experience that we have in our home is that a team of vehicles attempts to synchronize themselves to drive past our house in ways that prove that we are being watched in everything that we do inside of our home and on our computer.

I am a former member of the Republican Party of Bexar County, Texas. Since joining the party and filing these lawsuits, Donald Trump's campaign made it clear that we were 'seen' and were even being helped. Now, his team refuses to stop spying on us in a malicious way.

Please help us!
